The Mac operating system has several system level temporary folders which contain temp files used by MacOS itself along with various Mac apps. This temp folders are not intended to be user facing, but in some rare situations an advanced Mac user may find themselves requiring to locate the temp folder and maybe even to muck around in them together for systems administration purposes, troubleshooting, digital forensic purposes, or another specific reason.

This tutorial will show you where the temp folders are located on Mac OS and how to access them.
