About This Game

An action-rhythm-puzzle-platform game that will test your skills and your patience as the game's developer talks you through each screen. However, there may be more to this simple world of screens than what meets the eye, and this so-called developer may have motives of his own.

Features:

- Over 100 challenging levels – you will die. A lot.
- A peculiar story about facing the realities of life.
- Every level a puzzle – you must decipher the pattern behind each level to progress.
- An extraordinary original sound track by the amazingly talented Caleb Klomprens.
- Everything is synced with the music – use this to help get into the flow of the levels.
- A separate Free Play mode where you can try to play each chapter with the least amount of deaths and/or best time.

FAQ:

Q - Those colorful effects look cool, but they may be a bit much.

A - For those that are prone to seizures, or pro players who want a cleaner experience, a majority of the effects can be disabled in the Options menu.

Q - How many levels are there?

A - 103, 90 levels in the story plus 13 bonus levels.

Q - What is the estimated play time?

A - The average is about 3 hours. However, because the game is so difficult, play time can vary wildly from player to player. Some people have taken upwards of 6 hours, while the fastest we've seen someone beat it is 1 hour.

Q - Is there a way to just play through the levels without all of the story stuff?

A - Yes, you can play Free Play mode from the beginning, where story elements are disabled.

Q - The player character has a "01" on it, does that mean there will be multiplayer?

A - The "01" on the player is story related. There is currently no multiplayer. Multiplayer for Free Play mode was in the works for some time, but was cut due to time restraints. We *may* release it later on as a patch.

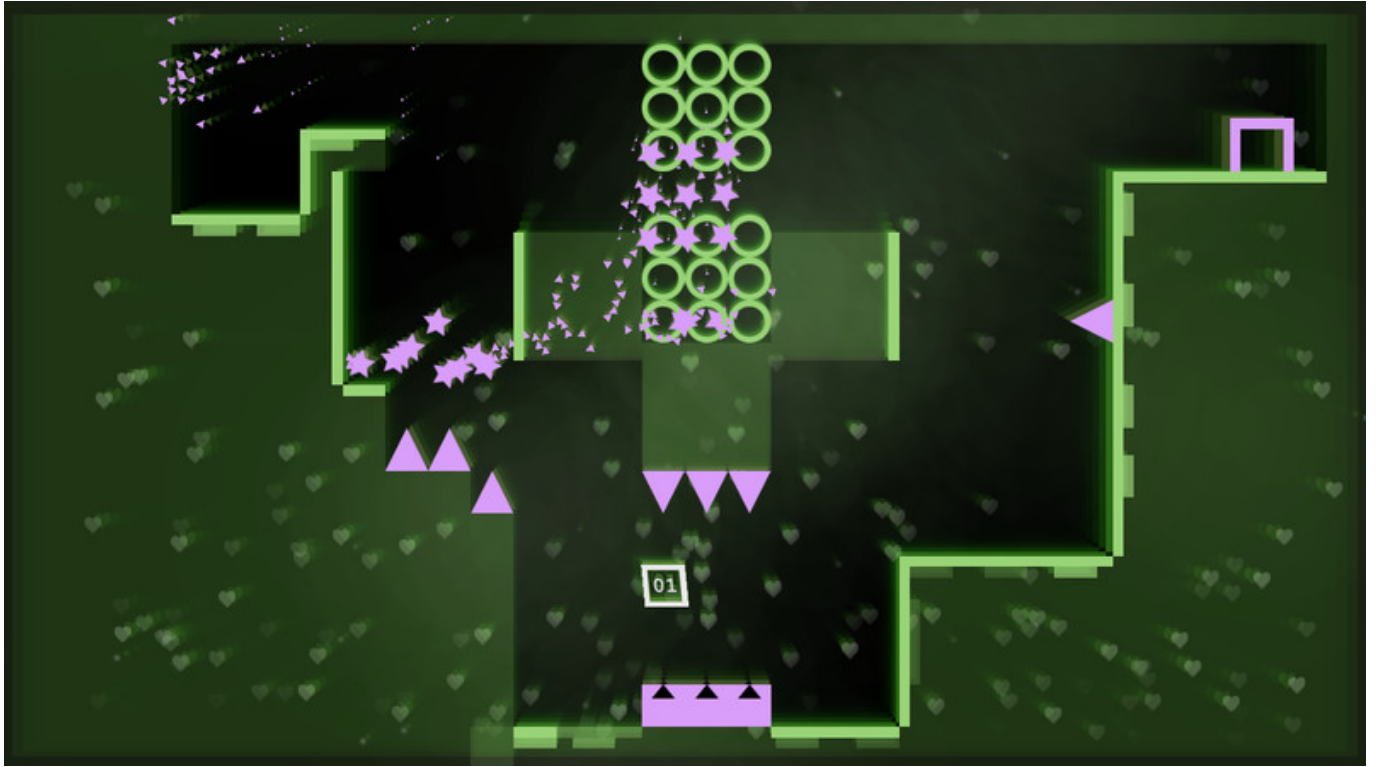

Q - Can I play this game on my Youtube or Twitch channel?

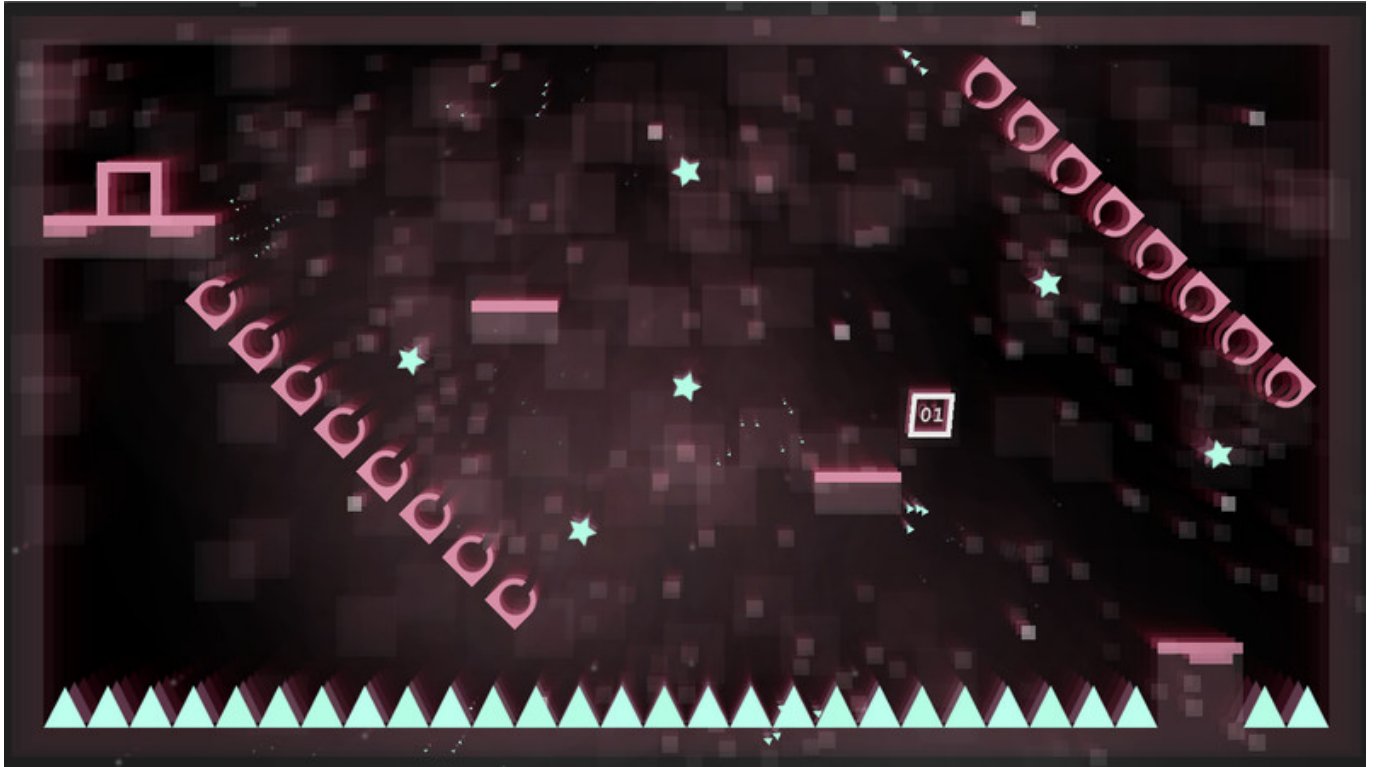

A - YES! Free marketing is always appreciated. Feel free to monetize the video too. Just make sure to link the Steam page in the description or in the video.

From what I have played of this game so far, I have really enjoyed it. I have followed this game since its debut on the greenlight page, and I have been waiting for this game's release for quite some time. The soundtrack is very good, and the gameplay is very smooth (Most of the time). The game is rather hard in its later levels, but if you are a fan of rhythm games and/or super meat boy like games, then this is the game for you.

My only downside to this game is the fact that the controls can sometimes be a bit delayed, which can be very annoying at times where timing is key. Not only that, but sometimes I can't jump, which might be a problem with my controller, or just a mechanic in the game. Eitherway, my rating for this game is still the same! 8/10!

EDIT: Some how, this game made me feel emotions for blocks with numbers on them. Well played game.. The God Paradox is an all-around solid precision platformer. The soundtrack is fantastic and the level design changes things up in interesting ways quite often. It's certainly a tough game and you'll almost definitely die a whole lot along the way, but it never feels unreasonable. The God Paradox is also good about pacing out its difficulty as, while the game gets harder overall as it goes on, it mixes in easier levels focused on narrative elements or introducing new mechanics rather than having every single level ramp up the difficulty.

As for the plot, I'm going to avoid giving any specific details. I'll say that this isn't the first time I've come across a story roughly along these lines in a game, but The God Paradox nonetheless tells its tale well and it has enough surprises along the way to keep things interesting.

I will say that this game is a bit on the short side. Even with plenty of deaths along the way, I finished it in about two hours, though your time may certainly vary depending upon how accustomed you are to precision platformers and how much you care about achievements. The brevity here isn't necessarily a negative either; the story didn't drag on and none of the various gimmicks, hazards, and mechanics grew stale. Overall, The God Paradox feels like it's exactly as long as it needs to be.

I had a lot of fun playing The God Paradox and it's clear that plenty of effort and love went into making it and polishing it up. I definitely recommend checking it out if you're looking for a challenging platformer with plenty of twists in both its gameplay and narrative.
